

ACS.MET1 SAFETY ASSESSMENT CRITERIA INITIAL & RE-ASSESSMENT

NATURAL GAS DOMESTIC GAS METERS WITH A MAXIMUM CAPACITY NOT EXCEEDING 6m³/h

Issue 5.2 ©ACS .SMB April 2018

MET1 Initial and Re-assessment

Introduction

Tests gas safety competences to install, commission, exchange and remove domestic gas meters. The reference to MET 2 is now withdrawn

CBs may adopt Competence and Criteria numbering different to that used in this document.

CB documentation may adopt wording for criteria different to that used in this document, provided the meaning is unaffected.

Range of meters

Primary or secondary meters of capacity up to and including 6 m³/h.

Pre-requisites

CCN1 or equivalent and changeover CESP1 or CMA1 or CMA3 or QCF or S/NVQ.

Operatives installing MP primary meters $\leq 6m^{3/h}$ with supply pressure > 75 mbar also require REGT1.

Operatives holding CESP1, CMA1 & CMA3 are limited to install, exchange, remove and commission primary meters only.

Exclusions

Meter reading, pre-payment mechanisms, meter box installation, construction of meter compartments or housings, gas service pipework installation, installation or exchange of emergency/meter controls to service pipework, service valves or their operation, meter removal from site and subsequent disposal, testing by Office of Gas Supply Technical Directorate or by OFGEM Technical Directorate and theft of gas.

References and normative documents

All relevant documents as listed in the Legislative, Normative & Informative Document List (LINDL) inc.:

- HSL56
- BS 6400-1
- BS 6400-2
- BS 6891
- IGE/G/6
- GIUSP.
- IGE/UP/1b

The References (REF) where indicated are only a guide to where the criteria can be resourced and therefore the REF may not be exhaustive.

ACS.SMB.003.ACDND identifies Normative Documents that should be held by ACs.
