

ENERGY & UTILITIES
INDEPENDENT
ASSESSMENT SERVICE

END-POINT ASSESSMENT FOR THE ENERGY AND UTILITIES SECTOR

Our **end-point assessment service** ensures apprentices can demonstrate they can do the job they have trained for in a competent and productive manner to meet the needs of safety critical industries.

For employers

The Energy & Utilities Independent Assessment Service was established in 2014 and is part of the **Energy & Utility Skills Group**. We deliver rigorous and robust apprenticeship end-point assessment services to the energy and utilities sector.

Our commitment to quality, the expertise of our technical experts and our end-point assessment tools all meet the needs of employers, their apprentices and the requirements of the apprenticeship standards and assessment plans.

Our clients include:

Collaboration Leads to Success

The Energy & Utilities Independent Assessment Service was the first end-point assessment provider to have achievers on the English Trailblazer apprenticeship standards. Working in collaboration is delivering for the energy and utilities sector:

First achievements in any sector on the English apprenticeship standards working with UK Power Networks

First achiever at level 2 in any sector on the English apprenticeship standards

First female engineer achiever at level 2 on the English apprenticeship standards working with E.ON

Working with the EUIAS has been a breath of fresh air, we now have an assessment body that understands our working environment. It's an organisation that listens to the voice of the employer and is able to articulate and interpret the latest guidance in a way that enables us, together with our apprentices, to achieve first rate apprenticeship achievements.

Work with us

As an employer-led end-point assessment body, the Energy & Utilities Independent Assessment Service aids transferability of skills across and within the energy and utilities sector. We work with employers and training providers to deliver a high quality service, which ensures that apprentices can do the job they have trained for in a safe, competent and productive manner.
