

SHEA POWER

A programme that covers the essentials of **safety, health and environmental awareness**; designed for those working across the **power industry**.

Benefits to your business

- Improved awareness of health, safety and environmental requirements
- A more competent and confident workforce
- Contextualised content makes it 100% relevant to individuals working in the power industry
- Interactive programme that caters for different learning styles
- Delivered by trainers with first-hand experience in the power industry

Energy & Utility Skills Register (EUSR) Registration

Individuals successfully completing the programme qualify for registration on EUSR for SHEA Power - valid for three years.

Access to CSCS controlled sites

SHEA registration allows access to CSCS controlled sites for utilities work.

Who the course is for

All individuals requiring awareness of safety, health and the environment prior to working on operational sites, including supervisors and managers.

Duration of training

One-day programme.
