Engineering & Manufacturing Route Review

**Institute for Apprenticeships
& Technical Education**

Register to participate in one of five regional workshops and spread the word

The Institute for Apprenticeships and Technical Education (the Institute) is hosting a series of consultation events as part of the Engineering and Manufacturing Route Review and need your help to spread the word amongst your networks to encourage attendance to get their voices heard.

Action: Please forward this email to relevant contacts in your network encouraging them to register to attend.

Who should attend?

To ensure stakeholders at all levels across industry and education are equally represented, we are inviting employers, training providers and End-Point

Assessment organisations interested in Engineering and Manufacturing (and across all sectors) to register to attend.

How to attend

[Please register for your chosen event on the dedicated event website.](#)

Why attend?

These five, free-to-register events offer all attendees a unique opportunity to shape the outcome of the route review and apprenticeship standards of the future. The fundamental aim is to ensure employers have a safe, competent and productive workforce and individuals enjoy purposeful, satisfying careers that begin with a high-quality apprenticeship.

The events

The events themselves will take place at easily accessible locations up and down the country on the following dates:

1. [27/02/20 – Birmingham](#)
2. [05/03/20 – Newcastle](#)
3. [12/03/20 – London](#)
4. [17/03/20 – Bristol](#)
5. [24/03/20 – Manchester](#)

Event format

We have agreed with IfATE a half-day event format designed to maximise attendee participation and minimise any disruption to the day-to-day operation of your business by ensuring that we are finished by 1300hrs.

At each event, the Institute will provide a brief update to participants of work in progress, but will mainly be there in a listening capacity. Which allows you to

share your thoughts and reflections on a sector which is evolving rapidly to meet the pace of change and industrial digitalisation.

Whilst attendance in person is encouraged (because it also provides an excellent networking opportunity), those who are unable to be there can still have their say via an [online survey](#).

Additional information

You can find out more about the [Engineering and Manufacturing Route Review](#) on the Institute's website. Questions about the events can be submitted directly via the [dedicated event website](#) or by emailing eventsupport@semta.org.uk.

Thank you for your kind assistance in supporting this important message. Together we will ensure a future skills provision that is fit for purpose and works for all.

Please share your thoughts about the #E&MRouteReview on social media before, during and after the events.

Regards,
Senta Events Support

PS. Please note tickets for each event are strictly limited and offered on a first-come-first-served basis. [Book your ticket now](#) to avoid disappointment.
