

# ACS. CESP1. CMA1. CMA2LS. SAFETY ASSESSMENT CRITERIA INITIAL AND RE-ASSESSMENT EMERGENCY SERVICE PROVIDER AND GAS METER INSTALLER NON-DOMESTIC AND DOMESTIC NATURAL GAS

ACS.SMB.004.AC.TABLE 2.CESP1.CMA1.CMA2 LS. INITIAL & RE-ASSESSMENT

CESP1; CMA1; CMA2LS INITIAL & RE-ASSESSMENT

#### Introduction

Tests gas safety competence in Core Domestic Limited Scope meter work **(CMA2LS)**; Core domestic and non-domestic emergency service gas work **(CESP1)** and Core domestic and non-domestic gas metering work **(CMA1)**.

**CMA2LS** is a limited core and pre-requisite to **MET3LS** which is the assessment combination for installing domestic gas meters which are sealed off at the meter outlet fitting and labelled; ensuring gas is not left available to the installation pipework and/or appliances.

The assessment criteria have been split into:

#### Part A: Generic Competencies (CMA1; CESP and CMA2LS)

- 1. Gas safety legislation and standards
- 2. Gas emergency actions and procedures
- 5. Installation of pipework and fittings (pipework within meter installation)
- 6. Tightness testing and purging
- 7. Checking operating pressure at outlet of meter and/or setting meter regulators\* /\*\*
- 8. Unsafe situations, use of emergency notices and warning labels
- 9. Operation and positioning of ECV, isolation controls and valves

#### Part B: Specific Competencies (CMA1 & CESP1 only)

- 1. Gas safety legislation and standards
- 3. Products and characteristics of combustion
- 4. Ventilation (for domestic and non-domestic appliances)
- 5. Installation of pipework and fittings (outlet pipework)
- 9. Operation and positioning of ECV, isolation controls and valves (non-domestic premises)
- 12. Chimney Standards
- 15. Re-establish existing gas supply and re-light appliances.

#### Part C: Re-Assessment of Options

No longer covered in this document and are found within respective criteria documents.

CBs may adopt Competence and Criteria numbering different to that used in this document.

CB documentation may adopt wording for criteria different to that used in this document, provided the meaning is unaffected.

#### Range

Primary 'Multi -Core' for gas meter and ESP type work.

CMA1 & CESP1: All gas fittings.

CMA2LS: not connecting to an outlet supply

#### **Pre-Requisites**

#### Initial:

However, CESP1, CMA1 and CMA2LS, as appropriate, are pre-requisite for all other natural gas safety assessments required for the ESP and meter installer sector.

## Re-Assessment (CESP1, CMA1 and CMA2LS)

CESP1, CMA1, CMA2LS, as appropriate.

Candidates holding CMA1 may undertake CESP1 re-assessment and vice versa.

#### Exclusions

**CMA1 & CESP1:** Work on appliances other than re-lighting after a temporary interruption to gas supply.

**CMA2LS:** Work on altering position of meters, meter exchange, connection of outlet pipework or commissioning on appliances or internal installation pipework other than that required for the meter installation.

#### Abbreviations

- AC Assessment Centre
- AECV Additional emergency control valve
- AIV Appliance isolation valve
- CFS Communal flue systems
- CSST Corrugated stainless steel tube.
- ECV Emergency control valve
- ESP Emergency service provider
- GT Gas transporter
- I Initial
- IV Installation volume
- LDF Leak detection fluid
- MIs Manufacturer's / manufacturers' instructions
- MIV Meter inlet valve
- MOP Maximum operating pressure
- OP Operating pressure
- OQ Oral questioning
- R Re-assessment
- Ref Reference

## PART A (CMA2LS; CESP; CMA1) 1. Gas safety legislation and standards

KNO	WLEDGE & UNDERSTANDING	REF	Ι	R
1.	HSL56:			
(i)	Reg.2 General interpretation and application 2(1), (2), (3), (4), (5)c (iii), (6), (7) (8)		~	
(ii)	Reg.3 Qualification and supervision 3(1), (2), (3), (5), (6), (7) and (8)		✓	
(iii)	Reg.4 Duty on employer		$\checkmark$	
(iv)	Reg.5 Materials and workmanship 5(1) to (3)		$\checkmark$	
(v)	Reg.6 General safety precautions 6(1) to (6)		$\checkmark$	
(vi)	Reg.7 Protection against damage 7(1) to (3)		✓	
(vii)	Reg.8 Existing gas fittings 8(1) to (3)		✓	
(viii)	Awareness of regional differences and requirements for		~	$\checkmark$
	non-combustible materials passing through exterior walls in high-risk residential buildings (HRRB)			
(viii)	Requirements for CO alarms in rented properties.		~	$\checkmark$

## 2. Gas emergency actions and procedures

KNO	WLEDGE & UNDERSTANDING	REF	Ι	R
1.	priorities of actions and responsibilities:			
(i)	action to stop a gas escape downstream of ECV		✓	
(ii)	action if gas continues to escape after turning off supply		✓	
2.	limits of flammability		$\checkmark$	
3.	specific gravity and its effect in relation to air		✓	
4.	hazardous ignition sources and their elimination		✓	
5.	methods of preventing/reducing dangerous concentrations of gas in atmosphere		✓	
6.	advice to occupants		$\checkmark$	
7.	HSL56: Reg.37 Escape of gas 37(1) to (4)		~	

# 5. Installation pipework and fittings (pipework within meter installation)

PER	FORMANCE CRITERIA	REF	I	R
1.	join threaded pipe using appropriate fittings, methods and agents		✓	
2.	connect threaded joint with washer using appropriate fittings, methods and		✓	
	agents			
3.	use of temporary earth continuity bond		$\checkmark$	
4.	check installation is gas tight. For re-assessment, Competency 6. can be		✓	
	assessed now			_
5.	purge installation pipework of air		$\checkmark$	
6.	identify installation pipework safety defects		$\checkmark$	$\checkmark$
KNO	WLEDGE & UNDERSTANDING	REF	I	R
1.	recognising correct types of outlet connections		✓	
2.	threaded fittings		✓	
2a	Press end connections, jointing requirements		✓	
3.	flexible and rigid connections		✓	_
4.	jointing agents for threaded and connections with washers		$\checkmark$	
5.	pipe supports, clips and fixing for outside pipework		✓	
6.	sleeving and sealing of pipework		✓	
7.	Main protective bonding conductor (minimum cross-sectional area)		$\checkmark$	
8.	fixing pipework when connected to a meter not securely restrained		✓	
9.	siting and installation of gas controls and isolation valves		✓	
9a	ventilation requirements for multiple meter installations		✓	✓
10.	HSL56:			
(i)	Reg.10 Maintaining electrical continuity		✓	
(ii)	Reg.18 Safe use of pipes 18 (1) and (2)		✓

(iv)	Reg.20 Protection of buildings		✓	_
(v)	Reg.22 Testing and purging of pipes 22 (1) to (3)		✓	
(vi)	Reg.23 Marking of pipes 23 (1) and (2)		✓	
11.	GIUSP. Identify MP installation. Pipework directly enters premises through		$\checkmark$	$\checkmark$

	rear spigot of meter box		
12.	Importance & suitable methods to protect stainless steel semi rigid	$\checkmark$	$\checkmark$
	connectors from corrosive products i.e. meter connections & flux		
13.	Restrictions for making and sealing holes into meter boxes	$\checkmark$	$\checkmark$
14.	Purpose and suitability to the use of non-contact voltage tester	✓	$\checkmark$
15.	Recognition of GT Standard Operating conditions & Pressure tiers	$\checkmark$	$\checkmark$

## **6a. Tightness testing and purging** (LP or MP with MIV fitted)

Total  $IV \le 0.035 \text{ m}^3$  up to 1¼ (steel) and / or 35 mm (copper) Operatives who test installations outside the scope of IGEM/UP/1B will require TPCP1A / TPCP1

1.	ORMANCE CRITERIA	REF	Ι	R
	testing new or existing installations with gas or air:			
(i)	visually inspect the installation to ensure joints made correctly and no open ends		$\checkmark$	$\checkmark$
(ii)	check appliances and ensure AIVs are open & any SSOV are open.		$\checkmark$	$\checkmark$
(iii)	turn off the gas installation at the appropriate valve:			
	<ul> <li>ECV /AECV for MOP &lt; 75mbar</li> </ul>		✓	$\checkmark$
	<ul> <li>or MIV for MOP &gt; 75mbar ensuring ECV is open</li> </ul>			
(iv)	connect the pressure gauge to a suitable pressure test point on the installation or, if		~	$\checkmark$
	testing with air, branch of test T-piece		-	·
(v)	If using gas, carry out a let-by test of the closed supply control valve.		<ul> <li>✓</li> </ul>	$\checkmark$
	(OQ) related to actions should do with a LP ECV letting by or a MP MIV letting by		-	•
(vi)	adjust the pressure to between 7 and 10 mbar.		<b>√</b>	$\checkmark$
	(OQ) related to MOP >75mbar, ensure the regulator on inlet side of MIV is activated			
(vii)	close the valve and note the gauge reading		✓	✓
(viii)	test for 1 minute. If pressure rises by more than 0.25 mbar, let-by may be occurring		✓	$\checkmark$
(ix)	if pressure rise is observed, if LP check valve by disconnecting its outlet union and			
	applying LDF to valve barrel		~	$\checkmark$
	(OQ) on actions for a MP supply			
(x)	on satisfactory completion of let-by test, slowly raise the pressure in the installation		<b>√</b>	$\checkmark$
	to between 20 and 21 mbar			
(xi)	turn off gas or air supply		$\checkmark$	$\checkmark$
(xii)	allow 1-minute stabilisation; if necessary re-adjust pressure to between 20 and		✓	$\checkmark$
	21 mbar		•	•
(xiii)	check for any perceptible movement (fall) of the gauge over the next 2-minute		<b>√</b>	~
	period		•	•
(xiv)	for new installations, or existing installations with no appliances connected check		✓	$\checkmark$
	there is no pressure drop		·	•
(xv)	for existing installations, check any pressure drop is within permissible values and		✓	~
	there is no smell of gas		v	v
(xvi)	if installation fails test, trace and repair escape and re-test installation		$\checkmark$	$\checkmark$
(xvii)	if tightness test is successful, remove pressure gauge and re-seal test point		$\checkmark$	$\checkmark$
(xviii)	when connected to gas, test pressure test point; ECV/AECV outlet connection;		✓	~
	regulator connections and, where appropriate, MIV connections with LDF		·	•
(xix)	purge installation		✓	✓
(xx)	record test results		/	
2.	locate and repair a gas escape		✓	$\checkmark$

## 6b. Tightness testing and purging (MP without MIV)

Total  $IV \le 0.035 \text{ m}^3$  up to 1¼ (steel) and / or 35 mm (copper) Operatives who test installations outside the scope of IGEM/UP/1B will require TPCP1A / TPCP1

PER	FORMANCE CRITERIA	REF	Ι	R
Tigh	tness testing existing NG installations for 75mbar <mop <math="">\leq 2bar without a</mop>			
MIV	(IGE/UP/1B Edition 3 Appendix 4 A4.3)			
1.	turn off the gas installation at the ECV		$\checkmark$	$\checkmark$
2.	connect the pressure gauge to a suitable pressure test point on the installation		$\checkmark$	$\checkmark$
3.	carry out a let-by test of the closed ECV as follows:		~	$\checkmark$
(i)	adjust the pressure to between 7 and 10 mbar		~	$\checkmark$
(ii)	operate the UPSO or excess flow valve reset to balance the pressures either side of the device, then allow it to re-shut		~	~
(iii)	close the ECV and note the gauge reading		$\checkmark$	$\checkmark$
(iv)	check for any perceptible movement (rise) of the gauge reading (>0.25 mbar) over the next 1-minute period		~	~
(v)	if ECV is letting-by the test is suspended, installation made safe, and the appropriate Gas Emergency Service Call Centre immediately notified (OQ)		~	~
4.	Slowly raise the pressure in the installation to between 18 and 19 mbar by opening the ECV then turn off the valve		~	~
5.	Allow 1minute for temperature and pressure stabilisation, if necessary, re-adjust the pressure to between 18 and 19 mbar (the test shall not proceed until a stable reading is obtained)		~	~
6.	Continue test as from 6a) 1 (xiii) to (xx)		$\checkmark$	$\checkmark$

# 7. Checking operating pressure at the meter outlet and/or setting meter regulators

\* CMA1 = Regulator checks in accordance with BS 6400

# \*\* CESP1= Operating Pressure & Regulator checks in accordance with BS 6400 & IGEM/G/13

PER	FORMANCE CRITERIA			REF	I	R
1.	Not CMA2LS				1	$\checkmark$
	Turn all appliances off				v	v
2.	zero pressure gauge and connect to meter test po	int			✓	$\checkmark$
3.	observe and record standing pressure at test poin	t			$\checkmark$	$\checkmark$
	For CMA1 & CESP1		For CMA2LS	REF	I	R
4a *	& ** operate the required number of appliances to ensure the operating pressure at the outlet of the meter is correct .	4b.	Install meter regulator test device and re- establish gas supply		~	~
5.	read and record OP on gauge (OQ) Supplementary oral question/s on:				~	~
	(i) effects of pressure absorption across pr installation	imary	/ meter		~	~
	(ii) effects of low and high flow rates on re- pressures	gulato	or outlet		~	~
6.	if reading is incorrect:					
(i)	use procedure for notifying ESP when pressures a range	are ou	tside specified		~	~
(ii)	apply procedure for an AMI for re-setting and seal	ling m	eter regulator		✓	$\checkmark$
7.	remove gauge; re-seal test point and test for gas	tightn	ess		$\checkmark$	$\checkmark$

# 15. Re-establish existing gas supply and re-light appliances/plant

PER	FORMANCE CRITERIA	REF	Ι	R
1.	re-establish gas supply		✓	$\checkmark$
2.	check installation is gas tight		$\checkmark$	✓
3.	check appliance(s)/plant visually and re-light inc.:			
(i)	purge system and appliances/plant of air		$\checkmark$	✓
(ii)	light appliance(s)/plant		$\checkmark$	✓
(iii)	confirm satisfactory operation of user controls		$\checkmark$	✓
(iv)	visually inspect appliance/plant installation(s) for unsafe situations		$\checkmark$	$\checkmark$
KNO	WLEDGE AND UNDERSTANDING	REF	Ι	R

#### ACS.SMB.004.AC.TABLE 2.CESP1.CMA1.CMA2 LS. INITIAL & RE-ASSESSMENT

1.	describe action when an un-commissioned appliance/plant is identified	$\checkmark$	
2.	confirm actions if pipework and appliance(s) /plant are not tested	$\checkmark$	
	(commissioned) when gas supply is re-established		
2a.	recognise correct gas cooker hose for use in multi - occupancy premises .	$\checkmark$	$\checkmark$
3.	HSL56: Reg.33 Testing of appliances 33(1) to (3)	$\checkmark$
